

HELP SUPPORT THESE AWESOME GARDENING PROGRAMS BY PARTICIPATING IN OUR

HOLIDAY GIVING TREE!

Here's how it works:

Read about these three great local organizations who would benefit from your support. Then select an ornament from the Giving Tree that reflects the amount you'd like to donate. Bring the ornament to the cashier to get a Portland Nursery Gift Card for the chosen organization.

We will send the gift card to them for you!

For your generosity, you will receive a coupon for \$5 off your next purchase of \$20 or more.

Everybody wins!

LEACH BOTANICAL GARDEN

Portland's own "secret garden", Leach is a historical, botanical, and cultural treasure that highlights Northwest natives and features unique collections including a modern physic garden, an alpine house, a hands-on laboratory for environmental education that encourages engagement with the physical sciences, and a demonstration site of sustainable practices. Leach Garden Friends maintains and enhances Leach Botanical Garden's living collections of plants for the purposes of education, research and conservation and preserves the legacy of the Garden's founders, John and Lilla Leach. They are currently redeveloping many sites to further enhance this very special piece of Portland history!

OUTGROWING HUNGER

Outgrowing Hunger builds cooperative neighborhood gardens where community members work together to grow healthy food for themselves and for neighbors in need. Their mission is to increase the ability of low-income individuals and families to obtain fresh foods, and they work to promote volunteerism on behalf of the food-insecure within the community to combat poverty through restoration of resources, relationships, and self-worth.

BRADLEY ANGLE

Bradley Angle's mission is to serve all people affected by domestic violence by providing people experiencing—or at risk of—domestic violence with safety, education, empowerment, healing, and hope. They are in the process of renovating their center's outdoor space, and are creating a Therapy Garden which will serve as a safe, healing space, as well as give families and children an opportunity to learn about and participate in growing fresh food.
